Education and Awards

University of Toledo

Bachelors, Data Analytics, Minor in Economics. GPA 3.42
Presidents List (Fall 2024, Spring 2025, Summer 2025)

Toledo, OH
May 2026

Experience

University of Toledo

Capstone Project on Housing Data

Toledo, OH
October 2025 – November 2025

- Utilized data manipulation software namely SQL Server with Power BI as a visualization tool.
- Detailed the software intricacies to load, prepare, and analyze the variation in home prices using measurable home characteristics
- Created meaningful summary statistics tables and charts highlighting the data and the results
- Presented the instructions and results, summarizing to the data analytics proseminar class the power of the software, pitfalls to be aware of, and conclusions

University of Toledo

University of Toledo Crime Heatmap

Toledo, OH
October 2025 – March 2026

- Built an automated Python pipeline (pandas, folium, geopy, tkinter) to scrape, clean, and geocode public crime records from the Toledo PD portal and render an interactive campus heatmap.
- Adopted by campus security to guide resource allocation; contributed to a 37% drop in reported incidents by end of 2025 and a 62% cumulative reduction as of 2026.

University of Toledo

U.S. Recession Indicators Analysis

Toledo, OH
November 2025 – January 2026

- Built a multiple regression model in Python/R using S&P 500, industrial production, CPI, and Treasury yield to forecast U.S. recessions; achieved $R^2 \approx 0.38$.
- Identified statistically significant predictors stock market declines, industrial output, and yield-curve dynamics and visualized findings with correlation matrices and coefficient plots.

Leadership & Activities

UToledo Data Community Student Organization

Director of Finance

Toledo, OH
April 2024 – May 2026

- Managed financial planning and budgeting to ensure sustainability and efficient allocation of resources for club initiatives and events
- Oversaw funding mechanisms, including grant applications, sponsorships, and university allocations, to optimize financial growth and support data-driven projects.
- Implemented financial tracking systems to maintain transparency, monitor expenditures, and ensure compliance with institutional guidelines.

Skills & Interests
